Sushi-Roll Making Machine

MKQ-185A

Superior new performance of loosening, rolling and wrapping sushi rice. The special resin rice hopper and built-in heater keep sushi rice at suitable temperature for a long time. Improved both softness of rice mats and stable dispensing of rice amount.

- Optional wrapping units are available to produce rolls wrapped on the size of 18,5 cm seaweed sheet in the sizes S/M/L. All wrapping units can be used to make "reverse" (inside-out) rolls.
- Memory function sets size parameters based on wrapping unit selection producing rice mats suitable for the selected wrapping unit.
- Easy to assemble and disassemble, saving time and labor.
- Safety sensors and covers are used around motion areas ensuring safe operations.
- Self-diagnostic function easily locates problem. Simple operation with few switches.
- No consumable goods (springs, etc) are used reducing running cost.

Specifications

| | |
|-------------------|----------------------------|
| Power Supply | Single Phase AC230V 50Hz * |
| Power Consumption | 100W |
| Hopper Capacity | Approx. 7.5kg |
| Dimension | W407 x D517 x H708 mm |
| Weight | Approx. 48kg |

* When a transformer is used. Without use of a transformer: AC1
